Tokyo University of Technology

keywords: E-commerce, Metaverse, Business, Culture, SNS, Healthcare

## More information about my communi :

### 1. My research goal :

How can you Improve your EC site of healthcare by using metaverse?

- By using the meta-verse virtual reality inside my EC site with adding the experience of Japanese beautiful culture so people can try the meta-verse and visit the Japanese shops or drug stores and can buy inside of the meta-verse virtual reality such like Japanese healthcare supplements.

Recently a lot of people start using virtual reality sets and the president of meta mr. Mark Zuckerberg Started to improve the meta-verse more and it will be very popular in the future so a lot of foreign people love the Japanese culture but they can't travel to Japan so in this case we can use the meta-verse inside the EC site and we can sell the Japanese healthcare supplements with the foreign people visit the virtual reality Japanese drug stores and try the Japanese Market.

### 2. What's special about my research now?

what is in the virtual reality inside the meta-verse is about entertainment and I couldn't see any virtual reality that I can do shopping inside the meta-verse virtual reality so I try to make this the shopping by using VISA can be possible so the meta verse will be first about the Japanese healthcare products and try the Japanese culture for those who love Japan.

3. Why ? - because the meta verse is the future

### 4. Abstract :

I finished and opened my EC site store that i designed and created officially last week and since I am influencer the sales is going very amazing and the new update is that I'm creating the meta-verse so I can add it because my audience all of Japan so they can do shopping inside the meta-verse and use the visa example:

### 5. result :

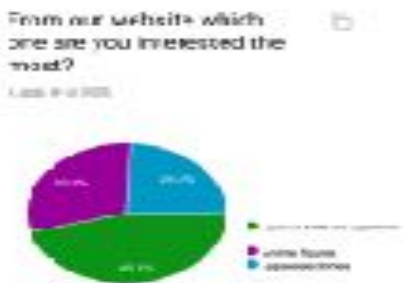

Also I tried to ask my followers again about what if you can buy from virtual reality Metaverse which way are you going to use your payment and this is the results :

What you'll use when you buy from us ?

1,252 件の回答

- The result shows that visa is the most used way for a payment even though there is a lot of new ways to buy such like Apple Pay but still visa is the most wanted so that's why I decided to choose visa.

The new update is I tried to create a way for payment the visa inside the meta verse I'm still learning about creating a beautiful virtual reality and adding the visa inside and the first shop I will create is a Japanese health care shop so people can buy from the Metaverse and receive the product from my EC site to inside their real life house.

One of the most common use cases for the Metaverse is real estate sales. There are many companies and individuals who are eager to get into this field. The platform's land blocks are known as parcels, and they can be acquired using the environment's specific cryptocurrency token. After you purchase real estate, you can either sell it at a higher price, or lease it to a VR event organizer or property developer.
